Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **The agent acts alone within the mandate you give it, and brings back everything outside it.**

What went out with no human intervention

Action	Volume	Within which bound of the mandate
Messages prepared and sent	88	Dated fact verified in a public register
Proposals signed and sent	6	Under €15,000 and under 30 days
Texts pulled from rotation	2 of 11	Accounted for 60 % of opt-outs

Effect of pulling the two texts

Indicator	Before	After	Send volume
Opt-out rate	11 %	4 %	Unchanged
Reply rate	6 %	6 %	Unchanged

It was not the volume: it was two texts. Volume was not reduced.

What is waiting for you, and why

File	Volume	Why the agent stops
Proposals above the ceiling	2	Outside the mandate — only you commit beyond it
Addresses of undocumented origin	340	A recipient is entitled to know where their address came from

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
