What is collected, what is not

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **I enrich a company, not a person.**

Source	Used?	What it brings
Public company register	**Yes**	**Legal form, declared headcount, directors, sites**
Company website	**Yes**	**Activity, locations, announcements**
Published tenders	**Yes**	**A dated need**
Your forms	**Yes**	**What the prospect entered themselves**
Address deduced from a pattern (first.last@…)	**No**	**A hypothesis, not data**
Personal profile on a social network	**No**	**Outside the professional context**
A person's private publications	**No**	**Out of scope**

Source	Used?	What it brings
Bought list with no consent origin	**No**	**Indefensible**

> **Your records will be less filled in than a data vendor promises.** What is on them is verifiable, dated, and you can answer "where did you get this?".

Why a person appears on a record

Because they hold **a role** and **have spoken to you** — not because a history was reconstructed.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
