Technical framework — where your management data lives

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Local inference, role-based access, processing in the EU targeted · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. **It describes the architecture actually offered.** A company's consolidated data gives a complete view of its position: margins, purchase prices, customers, outstanding balances. **Its protection is proportionate to its value.**

The two deployment modes, at the company's choice

Mode	Where computation happens	What leaves the network	For whom
Local inference	**On a machine at head office**	**Nothing**	Companies already hosting their data warehouse
Isolated resource	On a dedicated server hosted in France	**Nothing outside the European Union**	Companies that would rather not administer a machine

Local inference means the model computes on your machine: the contents of an order or a purchase price cross no external network to be processed. **In both modes the resource is dedicated:** no pooling with another client, nor with a competitor in your sector.

What protects your management data

Point	Implementation	What it lets you tell a customer or an auditor
Training	**None of your figures feeds a public model**	« What is learned from you serves you »
Encryption	In transit and at rest	« A stolen file stays unreadable »
Role-based access	**Rights follow the job: a branch manager sees his region, the controller sees everything, the apprentice sees volumes and not purchase prices**	« Only the people concerned see the file »
Analysis logging	**Who asked what, when, on which scope**	**« We answer an auditor without reopening twelve months of email »**
Hosting	**France, under French law**, architecture designed to reduce exposure to extraterritorial legislation, location alone not being enough to guarantee immunity	« Your data is processed within the European Union in the architecture chosen »
Read-only	**No database can be modified by a question**	« The analysis tool cannot damage the business systems »

What it is worth commercially

Fact	Value

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Share of revenue with public-sector customers	**21 %**
Last public contract signed	**Data-localisation clause accepted with no reservation and no derogation annex**
Data transfers outside the European Union	**0**
Management decisions taken without human validation, over the quarter	**0**

This document is the technical sheet your key accounts ask for at every renewal — hosting, subprocessors, retention periods, who accesses what. It is asked for once a year and takes three days to assemble; here it is kept up to date continuously.

For the executive team to settle

Deployment mode retained (local inference / isolated resource): _____

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
