# Who decides what — three automatic actions, not one more

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114
Document issued on 09/11/2026

What goes alone, what waits, and who decides · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. **Three automatic actions only, each reversible.** Everything else waits for a decision — **including the decisions that would make the company money.**

## The three automatic actions

| Action | What it protects | Reversibility |
|---|---|---|
| **Flag a scope change crossed by an answer** | **Stops an organisational gap being read as performance** | **If the change is cancelled, the flag disappears and the history returns to its original shape** |
| **Recalculate the history after a definition arbitration** | Comparability of the series | **The old series is never destroyed, it is dated** |

| Action | What it protects | Reversibility |
|---|---|---|
| **Publish the correction rate every month** | **Confidence in the answers** | **The one action whose withdrawal is not offered** |

## What always waits for a decision

| Action | Who decides | What the agent brings |
|---|---|---|
| Arbitrate an indicator definition | **The management controller** | The competing readings and the gap they produce |
| **Attribute a cause to a variance** | **The executive team** | **The breakdown, the comparisons, the tests already run — the reading needs context that is in no database** |
| **Revise a price, write to a customer** | **The executive team, by written mandate, capped, dated, withdrawable in one word** | **38 letters written and priced; 31 would go out in 20 minutes on the day of signature, zero without it** |
| Open access to a new person | The managing director | The proposed scope and what it exposes |

## The quarter in three framework measures

| Indicator | Quarter |
|---|---|
| **Management decisions taken without human validation** | **0** |
| Data leaving the European Union | **0** |
| Questions logged with their scope | **1,460** |

## The six analysis use cases ready to deploy — and the three that call for a dedicated agent

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

| Use case | Carried by this agent? | Detail |
|---|---|---|
| Plain-language questions | **Yes** | With no technical query |
| Fitting visualisations | **Yes** | The form follows the question |
| Scope displayed | **Yes** | Source, filters, definition, scope changes |
| **Sales tracking by axis and alerts** | **Dedicated agent** | **That is a job, not a question** |
| **Periodic activity reports** | **Dedicated agent** | Recurring documents with their own approval chain |
| **Variances on financial flows** | **Dedicated agent** | Financial analysis and anomaly detection |

> **Scoping for the three dedicated use cases is prepared.** The company decides which one is worth the next quarter — **the agent does not open a new scope on its own.**

## For the executive team to settle

Dedicated use case retained for the next quarter: _____

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
