Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **Knowing who looks at internal vacancies is knowing who is considering leaving their department** — that information is neither kept nor reported, not even as a count.

Item	Kept?	Why
Each advert's requirements and their verifiability	Yes	Improving adverts
Gaps between advert and actual recruitments	Yes	Deciding a criterion
Pairs of differing wordings, without names	Yes	Enriching the reading, not the people
Internal vacancies with no matching employee	Yes	Seeing what is missing
CV report after the recruitment closes	No	It has no further purpose
Score, ranking	Impossible	They do not exist

Item	Kept?	Why
Candidate profile	Impossible	No profile is built
Skills extracted from a CV poured into a database	Impossible	A CV is given for a post
An employee's viewing of internal vacancies	Impossible	It is an intention, not a fact

Wording pairs are kept without names. Knowing that "commercial name X" and "skill Y" often meet improves the reading of later CVs; knowing who wrote them improves nothing.

What the monthly summary contains

Content	What it indicates
Unverifiable requirements by advert	What does not sort
"Essential" requirements not applied	A sort whose rule is unknown
Most frequent wording gaps	A vocabulary to bring together
Internal skills with no vacancy	A mobility nobody sees

To be set by the company

Retention period for CV reports: _____ days after the recruitment closes

Retention period for wording pairs: _____ months

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually used.
