

Two columns, no percentage

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration; candidates are shown by a letter.
The report contains no percentage, no count, no colour, no order and no conclusion.

The report, on one CV

Requirement in the advert	What the CV says
Qualification at level X	p. 1, l. 4
8 years in the sector	p. 1, l. 9 — 9 years
Tool named Y	p. 2, l. 3 — different wording, see below
Language Z	Not found
Licence	p. 2, l. 11
Certification	Not found
Area	p. 1, l. 2

Requirement in the advert	What the CV says
Sector	p. 1, l. 9
Autonomy	To be assessed at interview
Team spirit	To be assessed at interview

The two wordings, side by side

Advert's word	CV's word	Equivalent?
Tool Y	Close commercial name	Not determined — for the reader to say

Sixty-seven CVs of 214 use a different word from the advert on at least one requirement. A tool searching for the exact word sets them all aside; a tool deciding they are equivalent wrongly matches some.

Why not even a count

Wording	Produced?	Why
"6 requirements of 8"	No	A licence and a qualification do not weigh the same
"75% fit"	No	Same, with a decimal added
Two columns, with the pages	Yes	Each line verifies separately

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
