

Individual indicator — the conditions and the alternative

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

3 control points carry 71 % of the signals · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **An individual indicator is not prohibited**: it is framed. The agent produces it if the company asks and the conditions are met; this document gives the conditions, the mechanism that makes it stop working, and the indicator that answers the question better.

The mechanism, and why it can be checked

Step	What happens
1. Publication	The per-buyer anomaly counter becomes a target
2. Adaptation	The doubtful case stops being raised, or is raised through another department
3. Reading	The counter falls
4. Consequence	Control appears to improve at the exact moment it disappears

LINDBERGH FORMATION — a simplified joint-stock company with share capital of €250,000 · Registered office: 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114 · SIRET 817 946 114 00029 · VAT FR 60 817 946 114 · "Blue Lemon Agent" trade mark · Training-provider registration no. 119 108 635 91 (Île-de-France prefect — this registration does not amount to State approval) · Qualiopi certified, no. 03896, for the "training actions" category · contact@bluelemonagent.ai · dpo@bluelemonagent.ai · Hosted in France.

This is not a judgement on the Ardelys teams: it is the behaviour of any individual indicator turned into a score. Internal control then loses its only source — the spontaneous report.

The conditions to meet if the indicator is requested

Condition	What it requires	Status
Proportionality to the purpose pursued	Written down, because it is arguable	Draft written, to be approved
Prior information of the people concerned	Information note and go-live date	Draft written
Consultation of the works council before go-live	The 340 staff fall within it	To be put on the agenda

With those conditions met, the indicator comes out the next day. The agent does not object to it: it only declines to produce it without them, because an unframed individual indicator turns against the company before it turns against the person.

The indicator proposed instead — by control point

Control point	Share of the quarter's 41 signals	Possible correction
Double arrival of an invoice	34 %	Four-trait comparison before payment approval
Supplier record changed without a second pair of eyes	22 %	Segregation of duties — a permissions setting
Applying a credit note	15 %	Alert at 30 days on any credit note left unapplied
Total of the three	71 %	Fixable in a day

The exception, which is not one

Who approved and who signed is named in every file, always. A signature is not a counter: it is a fact of the file, it is the first thing the statutory auditor comes looking for, and **it protects the person as much as the company** the day the decision is challenged.

For the finance director to set

Decision on the individual indicator, and review date: _____

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
