

The six financial uses — scopes and handovers

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

3 live, 3 neighbouring agents · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **Separating the agents is not a commercial limit: it is what keeps the permissions matrix readable**, and therefore the arrangement defensible before a statutory auditor.

The three uses live today

Use	Volume handled	Named decision-maker	Gain carried over from the page
Flow reconciliation	7,200 payments a quarter, 3 systems	Management accountant	40 % → 6 %
Documented signals	15,300 entries a month	Finance director	65 % → 8 %

Use	Volume handled	Named decision-maker	Gain carried over from the page
Audit trail	41 frozen signals, reconstructible at 14 months	Finance director and audit committee	30 % → 5 % on documentation

The three neighbouring agents

Agent	What it takes on	Why separately
Supplier invoice processing	Checking the invoice received, upstream of payment approval	It catches the double arrival before the cash goes out, where financial analysis catches it after
Accounting	Accounting summaries and data-entry anomalies	Another job, another decision-maker, another read scope
Banking, finance and insurance	The issues specific to the sector if the financing activity expands	A distinct regulatory scope

How the handover works

Step	What moves	What does not change
Financial analysis files a signal	The built file and its documents	The log stays single
The invoice agent takes over the check	The invoice concerned and the channel it arrived by	The audit trail runs across both agents
Decision	—	The named decision-maker remains the one for the business concerned

The pilot proposed

LINDBERGH FORMATION — a simplified joint-stock company with share capital of €250,000 · Registered office: 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114 · SIRET 817 946 114 00029 · VAT FR 60 817 946 114 · "Blue Lemon Agent" trade mark · Training-provider registration no. 119 108 635 91 (Île-de-France prefect — this registration does not amount to State approval) · Qualiopi certified, no. 03896, for the "training actions" category · contact@bluelemonagent.ai · dpo@bluelemonagent.ai · Hosted in France.

Parameter	Value proposed	Reason
Scope	One production site only	Enough to measure, small enough to correct
Duration	6 weeks	Two complete billing cycles
What it has to settle	What the double arrival really costs Ardelys	4 years of history say €121,000 — the pilot will confirm or disprove it

Zero is not a setting: no decision is automated, Deployment objective: processing and access within the European Union. That is how the agent is wired, and the log of the 41 signals proves it line by line.

For the finance director to set

Site chosen for the supplier-invoice pilot: _____

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
