Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **No obligation is removed from the register.** A removed obligation disappears from the record, and one must be able to show in 2028 that it applied until 2025 and was met until then.

Obligation	Attached to	Sold on	Deadlines produced since
A	Sold activity	**30/09/2025**	**1**
B	Sold activity	30/09/2025	**1**
C	Sold activity	30/09/2025	2
D	Sold activity	30/09/2025	**4 — quarterly**

A counter cluttered with overruns that no longer apply loses what makes it valuable: the attention paid to it. That is the real cost of these four obligations, it falls on the other eighty, and a dated extinction gives the counter back its use.

What is proposed

Action	Effect	The guarantee that comes with it
Mark "spent as of 30/09/2025"	**Stops producing deadlines**	**No removal**
Record the reason	**Sale of the activity**	—
Keep the earlier evidence	**The register keeps its memory**	—

The question the other way round

Did the 2025 sale give rise to new obligations — arising from the sale itself, or from what remains? The agent puts the question, and settles it with the company at the review it walks obligation by obligation.

> **The register contains only what the company put in it.** An obligation that is not in it cannot yet be tracked: that is the one limit of this arrangement, it is written here rather than left implicit, and walking the register obligation by obligation closes it.
