

Four obligations from a sold activity

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **No obligation is removed from the register.** A removed obligation disappears from the record, and one must be able to show in 2028 that it applied until 2025 and was met until then.

Obligation	Attached to	Sold on	Deadlines produced since
A	Sold activity	30/09/2025	1
B	Sold activity	30/09/2025	1
C	Sold activity	30/09/2025	2
D	Sold activity	30/09/2025	4 — quarterly

A counter permanently showing overruns nobody handles teaches people to stop looking at the counter. That is the real cost of these four obligations, and it falls on the other eighty.

What is proposed

Action	Effect	The guarantee that comes with it
Mark "spent as of 30/09/2025"	Stops producing deadlines	No removal
Record the reason	Sale of the activity	—
Keep the earlier evidence	The register keeps its memory	—

The question the other way round

Did the 2025 sale give rise to new obligations — arising from the sale itself, or from what remains? The agent puts the question and cannot answer it.

The register contains only what the company put in it. An obligation that is not in it will never make the agent flag anything, and that is the most dangerous hole in this arrangement — it is written here rather than left implicit.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
