Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **The agent does not forecast the outcome of the inspection.** A complete file is not a compliant file, and an inspector may find what the agent could not read.

State of the file	Obligations	What remains to be done	Time
Complete	5	Nothing	—
Document scope to read	4	2 minutes' reading each	~10 min
Undated document	2	Find an enforceable date	Varies
No document since 2024	1	Reconstitute	The longest

The one with no document is where to start, not the most visible one: reconstituting it takes longest, and it is the only one that cannot be caught up the night before.

8	Overall re-reading	—

The point of method

Everything produced between now and October will carry an August or September 2026 date. That shows in a file, and it is better known before an inspector notices — it is information, not a reproach.

Three guarantees that make the file hold up before an inspector: the judgement belongs to the company and its counsel

What the agent rules out	Why
An estimate of the outcome	A complete file is not a compliant file
A certificate to present	It would be used against the company
A line of defence	That is an adviser's role
