Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. The measurements come from the **SIEM**, the **qualification log** and the **analysts' activity records**. No outside data is used.

Time, on the three measured tasks

Task	Before	After
Correlating events	65 %	7 %
Qualifying an alert	40 %	6 %
Building the investigation file	30 %	4 %
Arrival → qualification delay	4 h 10	6 minutes
Alerts received per week	1,400	640, all qualified

What it gave in security

Measure	Value	Comparison
Real incidents detected in the quarter	2	—
Qualification time of the fastest	11 minutes	Same kind of incident last year: discovered after 6 days
Analyst hours spent on hardening	+62 %	That is the work that drives incident counts down

The unfavourable measure, its cause and its correction

Finding	Value	Cause	Correction and effect
Signals qualified « to investigate » that proved groundless	2 of 47	Planned migration not declared in the change calendar	Calendar read before qualifying
Analyst time spent	6 hours	The export-volume rule	Migrations now entered — 11 since
Signals of that kind over the last 6 weeks	0	—	Measurement republished at the quarter

A rule is judged on its precision and on how much hindsight backs it. The correction carries six weeks of hindsight; the measurement is taken again and republished at the full quarter, with the same rule-by-rule detail.
