Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **One of the six sources ran 3.2 seconds behind**: without that realignment, two events appeared in the wrong order. **The order of a chain is what makes it usable**, and the realignment is documented line by line.

The sequence

Timestamp	Event	Source	Notable element
04:12:06	**Service account authenticates from workstation P-1147**	Directory	**Machine absent from its list of 2 servers**
04:12:09	Session opened on the accounting file server	Server log	—
04:12:44 → 04:19:31	**1,842 file reads across 3 directories**	Server log	**1,615 in a directory never touched in 90 days**

Timestamp	Event	Source	Notable element
04:21:02	**Outbound connection attempt to an external address**	Firewall	**Blocked — established fact, verdict in the log**
04:21:05 → 04:26:18	**7 further attempts**	Firewall	**All blocked**

The perimeter established

Element	Value	Source establishing it
Accounts involved	**1**	Directory
Machines involved	**2**	Directory and server log
Directories touched	**3**	Server log
Data exfiltration recorded	**None**	**Firewall log, 8 attempts with verdicts**
Still to establish	**Origin of the access to workstation P-1147**	**Workstation local log — read-only collection request drafted**

> **Building the investigation file moves from 30 % to 4 % of the effort.** This one was built in four minutes, dated, sealed and preserved — and it grows with every later action, carrying the second at which it was executed.

Collection of the P-1147 local log — authorisation and date: _____
