> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for demonstration. The proposed order is built on **the ratio of reach to effort**, and the effect of each opening on alert volume was simulated across **30 days of real archives** before being proposed.

The till simulation, across 30 days of archives

Situation	Alerts per week	Of which useful to analysts
With no adapted rule	**+40 raw**	—
With the 3 rules written for that source	**6**	**4**
Absorbed by the triage, reason viewable	34	—

The order proposed

Rank	Source	Effort	Cost	Reason for the rank
1	**Supplier portal**	**Half a day**	Negligible	**Best ratio of reach to effort**
2	**Two pilot stores**	Immediate	**€8 over three weeks**	**Decision on the other 82 taken on in-house figures**
3	Office file store	Progressive	€90/month	**Closes the gap seen in investigation**

The collection mandate

Clause	Content
Purpose	**Read the logs of the listed sources, and nothing else — no access to business content, no writing**
Scope	**Sources named individually, added one at a time and never by family**
Term	**Three weeks for the pilots, renewed in one word on the figures**
Withdrawal	**In one word — collection stops, the archives remain with the company**
Trail	**Every source activated is logged with the signature that covered it**

Sources activated and date: _____
