Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **No failure threshold triggers a report** — a deliberate absence, not a setting turned to zero.

Attempts at the same module	Learners	Report triggered
1	**174**	**None**
2	**41**	**None**
3	**19**	**None**
4 or more	**61**	**None**

A learner who knows a third failure triggers a report stops at the second, and nobody learns that they do not understand. The threshold produces exactly the opposite of what it seeks.

What the agent looks at instead

Situation	What it indicates	Action
3 failures on a question everybody passes	**Nothing usable**	**None**
3 failures on a question 40% get wrong	**The question is bad**	**Flagged to the author**

What the learner is offered

Element	Provided?
Retake as often as they wish	**Yes**
The page of the material, every time	**Yes**
A rewording of the question	**Yes**
The reference contact	**Yes**
A warning to that contact	**No — it is for the learner to approach them**

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
