Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **No failure threshold triggers a report** — a deliberate absence, not a setting turned to zero.

Attempts at the same module	Learners	Report triggered
1	174	None
2	41	None
3	19	None
4 or more	61	None

A learner who knows a third failure triggers a report stops at the second, and nobody learns that they do not understand. The threshold produces exactly the opposite of what it seeks.

What the agent looks at instead

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
