Fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for demonstration. **Earlier completions are not invalidated**: they were valid, the material at the time said that.

Element	Value
Module	**7**
Change	**12/02/2026**
Sections in total	**34**
Sections changed	**3**
Sections identical	**31**
Completions before the change	**34**

The two ways to catch up

Option	Duration	What happens in practice
Retake the whole module	**~2 hours**	**Nobody does it**
The 3 changed sections, with the differences highlighted	**11 minutes**	**It gets done**

> **Redoing the lot for three sections is the surest way that nobody does it.** The duration is not a comfort: it decides whether the catch-up happens at all.

What the targeted catch-up saves you: three sections to redo instead of thirty-four

Action	Done?	Why
Invalidate the earlier completion	**No**	**It was valid at the time**
Retake the whole module	**Not proposed**	**31 sections of 34 identical**

The real flag

Three modules were changed without anyone being told. That is the underlying subject, and it will recur at the next change if nothing warns — the 34 out-of-date completions are only its visible consequence.
