Thirty-four contracts in circuit

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **No chaser is sent to the client.** A chaser on a contract under negotiation is a commercial act, and its tone depends on what the company wants to obtain.

Blockage	Contracts	Median age	Oldest
Client signature	**19**	11 days	**62 days**
Internal approval	**8**	**18 days**	**41 days**
Missing annex	4	9 days	22 days
No identifiable reason	**3**	**41 days**	**53 days**

A contract awaiting signature for 8 days is normal; for 62 days it is probably dead and nobody has recorded that. Age changes the nature of the flag, not only its urgency.

The three blocked with no reason

Contract	Last exchange	Since	Chaser sent?
A	16/06/2026	**53 days**	**No**
B	02/07/2026	37 days	**No**
C	09/07/2026	30 days	**No**

The 8 awaiting internal approval

Approver	Contracts waiting	Longest wait
Person 1	**5**	**41 days**
Person 2	2	19 days
Person 3	1	12 days

> **Five of eight contracts are waiting on the same person.** The flag goes to that person, not to a dashboard: the point is to unblock five contracts, not to establish a finding.

What is provided, and what is not

Element	Provided?
Blockage named for each	**Yes**
Age	**Yes**
Who must approve, and since when	**Yes**
Chaser to the client	**No**
Ranking of approvers	**No**

---

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
