Twenty-nine modified references, eleven pages to rewrite

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **An outdated page is neither broken, empty nor suspect** — nothing signals it.

Situation	Count
Supplier datasheets updated	**29**
Where a shown characteristic no longer matches	**11**
Needing no rewrite	**18**
Oldest unreviewed page	**3 years**

The comparison is only possible because the supplier data version is recorded on each page. Without it, this check does not exist.

Why the eleven arrive already sorted, and what it spares you

The 29 supplier changes are compared against what your pages display, and only the **11** whose characteristic no longer matches come back to you: the other 18 need no rewriting. That sorting is where the value is, because **a supplier change can be a typo fix or a product change**, and the two look alike in a file — only somebody who knows the product tells them apart. You review eleven pages instead of twenty-nine, and none is rewritten behind your back.

What is reported

Element	Supplied?
The reference	**Yes**
What changed	**Yes**
How old your version is	**Yes**
Whether the modified characteristic is shown	**Yes**

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
