Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **The four conditions are mechanically checkable: the agent judges nothing, it observes.**

What authorises publishing with no intervention

Condition	Mechanically checkable?	What it prevents
Every characteristic carries a dated supplier source	**Yes**	**The 187 values copied from an untraceable text**
No unsourced numeric claim	**Yes**	**The 41 "up to 30 % savings"**
No paragraph shared with another page	**Yes**	**The 340 pages with identical text**
Supplier reference unchanged since the update	**Yes**	**The 29 pages describing a product that changed**

What still escalates

Case	Count	Why a human decides
Numeric claim with no origin	**41**	**It binds the company**
Prices	**All**	**Not a characteristic, a commitment**
Supplier reference changed	**29**	**Is the product being sold still the same?**

The time gain

Step	Before	After
Read-through before going live	**4 days on average**	**Removed on most of the catalogue**

What happens if a source moves AFTER publishing

The characteristic concerned is **unpublished** and the flag goes out. **A live page asserting something out of date is an assertion made to the public: an empty field beats a false one.**

For the company to settle

Who approves a numeric claim: _____

Maximum time to handle an unpublishing: _____ hours
