Where your subscriber list and unpublished content live

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Architecture, access, logging · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **Two possible architectures, one single promise:** no subscriber address and no unpublished item leaves the European Union, and nothing entrusted to the agent trains a model.

The two deployment routes

Route	Where computing happens	What leaves the network	For whom
Local inference	On a machine owned by the company	**Nothing**	Embargoed content, financial announcements
Isolated resource hosted in France	Dedicated environment, under French law	Nothing outside the European Union	The common case — no machine to run

Route	Where computing happens	What leaves the network	For whom
Sharing with other clients	—	—	**Never**

Who accesses what — rights follow the job

Role	Composes and proposes	Sees addresses	Triggers the send
Editorial lead	Yes	No	**Yes — alone**
Communications officer	Yes	No	No
Apprentice	Yes	**No**	**No**
Data officer	No	Yes	No

What is logged, and what the log proves

Event traced	Detail kept	Question it answers
Composition of an issue	Author, time, items chosen	« Who proposed this item? »
Change	Author, field, value before and after	« Who changed this subject line? »
Approval and send	**Person, time, number of recipients**	**« Who decided this should go out? »**
Unsubscribe	Timestamp, issue concerned	« Was this request honoured? »

What the log makes possible in practice: a question from the data officer — or from a subscriber asking why they receive the newsletter — is settled in three minutes instead of three days, and the answer rests on a record, not on a recollection.

The commercial argument, in figures

Legal notice (in French): bluelemonagent.ai/mentions-legales

Fact	Value	What it opens
2025 public tenders with a France-hosting clause	**2**	**Criterion met without reservation**
« Public sector » subscribers	2,400	The most profitable segment, and the most exacting
Transfers outside the European Union	**0**	Architecture designed to reduce exposure to extraterritorial legislation, location alone not being enough to guarantee immunity
Data used to train a model	**0**	What the agent learns from Alveor serves Alveor

> **No change of tools.** The agent plugs into the existing sending platform, CMS and catalogue. No migration, no extra subscription for the teams.

To settle with the data officer

Retention period for send logs, in months: _____

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
