# Technical framework — where your negotiated terms live

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Local inference or an isolated resource in France · fictional document

**Fictional document — demonstration example**

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

**Fictional document**, produced for the demonstration. **The four things a competitor would pay to read are your prices per lot, your liability caps, your penalty rates and your supplier price grids.** This exhibit says where they live, who reaches them and what leaves — **nothing.**

## The two possible architectures

| Architecture | Where the computing happens | What crosses an outside network | For whom |
|---|---|---|---|
| **Local inference** | **On a machine at head office** | **Nothing** | Companies that already host |
| **Isolated resource hosted in France** | On an environment dedicated to Velmaris | **An encrypted flow, with no exit from the European Union** | **No pooling with any other company** |

## What is protected, and by what

| Protection | Implementation | What it makes verifiable |
|---|---|---|
| Encryption | In transit and at rest | — |
| **Role-based access** | **Rights follow the job: a contract administrator opens the signature workflow, not the financial terms of client contracts** | **The list of roles and their rights, exportable** |
| **Logging** | Who consulted what, when, file by file | **An audit answer in 10 minutes** |
| **Location** | **France, under French law** | **Architecture designed to reduce exposure to extraterritorial legislation, location alone not being enough to guarantee immunity, including against a US provider hosting in Europe** |
| Use of the data | **No contract is used to train a model** | A written contractual undertaking |

## Why this is a commercial argument, not only a technical one

| Fact | Value | Consequence |
|---|---|---|
| **Contracts carrying a confidentiality clause** | **208 out of 412** | **The confidentiality undertaking is held by the architecture** |
| **Clients requiring hosting in France** | **3 (2 social housing landlords, 1 local authority)** | A condition of market access |
| **Last tender** | **Scored out of 5 points** | **Box ticked, technical sheet attached and up to date** |

Legal notice (in French): bluelemonagent.ai/mentions-legales

**Technical sheet kept current continuously:** hosting, subprocessors, retention periods, who accesses what, and the date of the last check. **It is asked for at every renewal and it used to take three days to compile.**

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
