Technical framework — where your content lives, and how you leave

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Local inference, read-only, processing in the EU targeted · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. **It describes the architecture actually proposed.** Unified search touches the whole information estate of the company — drawings, contracts, site files, internal exchanges: **the most sensitive content Ventaline holds.**

The two deployment modes, at the company's choice

Mode	Where computing happens	What leaves the network	For whom
Local inference	**On a Ventaline machine**	**Nothing**	Companies that already host their own file servers
Isolated resource	On a dedicated server hosted in France, under French law	**Nothing outside the European Union**	Companies that would rather not run a machine

Local inference means the model computes on your machine: the text of a drawing or a contract crosses no outside network to be processed. **In both cases the resource is strictly dedicated to Ventaline** — no sharing with any other business.

What protects your internal content

Point	Implementation	What it lets you write in a tender response
Training	**No content feeds any model, neither ours nor a third party's**	“What the system learns from us serves us”
Write permissions	**The technical read account has no write permission**	“The tool cannot modify our documents, technically”
Encryption	In transit and at rest	“A stolen medium stays unreadable”
Role-based access	**Rights follow the job**: an after-sales technician opens site files, not distribution contracts	“Everyone sees only their own perimeter”
Logging	Who searched for what, when, and what the system returned	“Every consultation is traceable”
Hosting	**France, under French law**, architecture designed to reduce exposure to extraterritorial legislation, location alone not being enough to guarantee immunity	“Deployment objective: processing and access within the European Union”

What it is worth commercially, at Ventaline

Fact	Value
Sites still under warranty or under a maintenance contract	**190**
of which healthcare establishments and public bodies requiring hosting in France in their specifications	**34**

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Fact	Value
Hosting criterion in the last public tender Ventaline answered	**Scored — the response ticked “under review”**
Data transfers outside the European Union	**0**
Documents modified by the agent, over the quarter	**0 out of 8,700 traced searches**

Leaving — verifiable before you sign, not after

Item	What happens to it on the day you stop	What stays with Ventaline
The index	**Deleted**	**The 1.9 million files have not moved by a single byte** — same folders, same names, same rights
The search log	Handed over in an open format, or destroyed	**The choice is settled at go-live, not on the way out**
The glossary of 340 equivalences	Exported in a format readable without us	**It is made of your material: it belongs to you**
The 46 approved notes	They are already in your site files	**They were filed there as they went, not at the exit**
The six sources	**Unchanged**	**No migration on the way in, therefore no migration on the way out**

> **A dry-run exit is proposed at the end of the first quarter**, half a day: we switch off, we check that the six sources work exactly as before, we switch back on. **A system you cannot leave is a system you should not have installed** — and Ventaline is entitled to have that written into the contract.

For Ventaline to settle

Deployment mode chosen (local inference / isolated resource): _____

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.
https://bluelemonagent.ai/en/entreprises/cas-usage/agent-de-gestion-de-la-connaissance-dentreprise

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
