What the agent does alone — three actions

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

3 reversible actions, 4 non-configurable prohibitions · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **Three actions, not one more, and each can be withdrawn with a word.** Everything else waits for a request. This is the page to take to the executive committee.

The three actions

Action	Frequency	The reverse is true too	Withdrawal
Indexing of recent deposits	**Every night**	**A document deleted from a source disappears from the index at the same hour — no copy of a document you decided to erase**	With a word
Following rights when they change	**Same day**	**A departure closes access within the hour; past searches stay in the log without their results being replayable**	With a word

Action	Frequency	The reverse is true too	Withdrawal
Report of the ten most-searched terms returning nothing	**Once a month**	**No person's name: search terms, not searchers**	With a word

What is never automatic, and is not configurable

Prohibition	Why
Writing to a source	**The technical account has no write permission**
Opening an access	**It belongs to the administrators of each space**
Deleting a document	The agent works read-only
Ranking staff	**See below — the reason is mechanical, not moral**

Why “searches per employee” would destroy the tool

Step	What happens
1. The indicator is published	Everyone discovers they are being counted
2. The indicator becomes a target	**People search for the counter, or avoid searching**
3. The log stops describing reality	It describes the reaction to the counter
4. The tool that showed what the company does not know shows nothing	**You lose the instrument, not just the measure**

What is measured instead

Indicator	This month's value	What it allows you to decide

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Questions asked	**2,900**	The real size of the need
Sources that served an answer	6 out of 6	No source connected for nothing
Least-used source	**14 answers out of 2,900**	**A document governance question, asked without putting a single name on it**
Terms searched with no result	The top ten, every month	The rest of the glossary

If Ventaline still wants an indicator by department

Condition to meet	What the agent brings
Prior information to staff	**Note ready, stating what is measured and what is not**
Written purpose	Draft wording, to be corrected by management
Retention period	Costed proposal, configurable
Employee representative bodies	**Consultation is Ventaline's responsibility — the agent supplies the file, not the decision**

> **An indicator by department is not a refusal: it is your company and it is your decision.** The agent brings the conditions met and the file ready; it does not stand in for management in taking it.

For Ventaline to settle

Automatic actions approved by the executive committee: _____

---

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
