Searches returning nothing — 221, then 63

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

7.6 % → 2.1 % after text recognition on 22,400 documents · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **This is the figure the agent publishes about itself, and it is better coming from it.** It is given with its measured cause, what was done, and the following month's result.

The first month

Measure	Value	Share
Searches this month	**2,900**	100 %
Searches returning nothing	**221**	**7.6 %**
of which documents predating 2019, scanned as plain images	**197**	**89 % of the failures**
of which documents that do not exist	24	11 % of the failures

An image of a page has no text: the document is there, it opens, and it is unreadable by a search. And **knowing in ten seconds that a document does not exist beats hunting for it for three days** — the 24 failures in the second category are

already a gain.

What was done

Operation	Volume	Duration	Effect on the originals
Text recognition over the pre-2019 holdings	**22,400 documents**	**11 nights**	**No original touched — the recognised text is stored in the index, not in your files**

Text recognition reads the words inside an image of a page: the scanned document becomes one you can read, search and quote.

The following month

Measure	Month 1	Month 2	Change
Searches	2,900	3,000	+100
Returning nothing	**221 — 7.6 %**	**63 — 2.1 %**	**−158**
of which on documents that genuinely do not exist	24	**47**	**What remains is management information, not a search defect**

The rule held to most firmly

Situation	What the agent does	What you gain
A test record does not exist	**It says what is missing, where it looked, and who would have it**	**No document ever becomes “probably compliant”: what the agent hands you can be produced in front of a customer or an auditor**
A value is unreadable	It is flagged as unreadable, with the document's location	It is never guessed from the context: you know where to go and read it, and the figure you reuse is the document's own

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —

A guessed value is indistinguishable from a read value, and that is what would make the rest of the system unusable. The published failure rate is the price of that rule — **and it is a price paid once, whereas an invented value is paid for at every reuse.**

The month's top three searches returning nothing

What is searched for	Occurrences	What it reveals
Acoustic test records 2015-2018	**14**	**The design office believed it had archived them — that is management information**
Insurance certificates for two subcontractors	9	Never filed in a connected source
Commissioning manuals for a discontinued range	6	They exist at the manufacturer's, not at yours

> **Monthly report proposed:** the ten most frequent searches returning nothing, sent to the head of information systems. **No person's name appears in it — search terms, not searchers.**

For Ventaline to settle

Recipient of the monthly report on searches returning nothing: _____

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the
