The three handovers — who takes what

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

640 revision questions, 470 internal questions, 26 joiners · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **An agent that accepts everything becomes average at everything**, and the design office would pay for it first. The three dedicated agents plug into **the same six sources, with the same rights and the same log**: nothing is connected twice.

The proposed split

Subject	What the knowledge agent does	What the dedicated agent does	Volume at Ventaline
Set of 400,000 revised drawings	**Says where the drawing is and which revision governs**	**Compares two revisions, lists what changed between them, ties each drawing to its parts list**	**640 questions a quarter across the 190 sites under contract**

Subject	What the knowledge agent does	What the dedicated agent does	Volume at Ventaline
Internal-life questions	Answers by quoting the note and its date	**Answers in plain language, keeps the history of the rule's versions, can say what has changed since last year**	**470 searches a month across twelve subjects**
Learning the procedures	Provides the document	**Trains, questions, checks what has been learned**	**26 after-sales technicians recruited over two years, five months to learn where to look**

A versioned set is one where every document exists in several successive revisions and where only the latest applicable one governs. Knowing where the drawing is and knowing what changed between two revisions are two different trades.

The twelve internal-life subjects that clog document search

Subject	Searches per month	What an intranet agent adds
Leave and absence	**112**	**The rule in force, and what has changed since last year**
Expenses	94	The scale applicable on the date of the expense
Remote working	71	The agreement in force and its conditions
Badges and site access	48	The procedure to follow, not just the note
… and 8 further subjects	145	Same logic

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Subject	Searches per month	What an intranet agent adds
Total	**470 out of 2,900**	**16 % of the company's searches**

The proposed order, and why

Rank	Agent	Reason	Expected effect
1	**Internal FAQ**	**The quickest to bring into service**	**Clears 470 searches a month out of the document channel — which mechanically improves what is returned on the other 2,430**
2	Technical document agent	640 questions a quarter, on the largest set of documents	The design office stops comparing revisions by hand
3	Internal training	26 joiners over two years	A technician becomes self-sufficient sooner

What does not change from one agent to the next

Point	Common rule
Access perimeter	**That of the person asking, never widened**
Writing to the sources	**None**
Log	**The same one, readable by the same two people**
Hosting	**Local inference or an isolated resource in France**

> **Connecting the sources is not done twice.** The six sources are indexed once; the dedicated agents plug into them with no new integration project and no new compliance file.

For Ventaline to settle

Deployment order for the three dedicated agents: _____

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

https://bluelemonagent.ai/en/entreprises/cas-usage/agent-de-gestion-de-la-connaissance-dentreprise

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
