Cash tied up, urgent orders removed

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Six months · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **A replenishment agent has a simple way never to be wrong: propose generously.**

Effect of the proposals over six months	Value
Cash tied up beyond the previous rule	**€34,000**
Urgent orders removed	**21**
Items where the proposal was excessive	**4**

On those 4 items, **the stock stayed dormant and the rule was corrected.**

What is published monthly

Indicator	What it allows
Cash tied up by my proposals, item by item	**Tracing dormant stock back to the rule that produced it**

Indicator	What it allows
Items whose proposed stock was not consumed	**Correcting the rule**

What the decision requires

The right stock level **is not a technical figure**: it depends on what a stockout costs you.

Estimated cost of a stockout on a critical item: _____ €

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
