

What is kept, what is impossible

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **A stockout is almost always explained by a reorder point set one day and never revisited.**

Item	Kept?	Why
Stock movements	Yes	Reconstructing a consumption
Counts and their gaps	Yes	Knowing whether stock is reliable
Real supplier lead times per order	Yes	The stated lead time is not enough
Proposals made and what they gave	Yes	Judging the agent
Urgent orders and their surcharge	Yes	Costing the trade-off
Calculation parameters, date and author of last change	Yes	Not rediscussing the same question yearly
Gap attached to a person	Impossible	Naming at random

Item	Kept?	Why
Individual activity measure	Impossible	Would end breakage reporting
Customer data beyond what explains a consumption	Impossible	Out of scope
Negotiated purchase price	Impossible	Those are in your contracts

To be set by the company

Stock-gap threshold triggering a flag: _____ %

Time with no issue before proposals are suspended: _____ months

How often reorder points are reviewed: _____ months

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
