Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **Five causes produce exactly the same gap in the data.**

Finding	Value
Items whose gap exceeds 5 %	**9**
Whose gap exceeds 20 %	**2**
Known appearance date	**Between two counts**

The five indistinguishable causes

Possible cause	Gap produced in the data
Undeclared breakage	**Identical**
Unrecorded issue	**Identical**
Receiving error	**Identical**

Possible cause	Gap produced in the data
Part taken for a repair	**Identical**
Mis-scanned code	**Identical**

> **Until the gap is resolved, no replenishment is computed on those items**: a reorder point on false stock proposes a false figure with confidence.

> **Request a demo with your own documents**
>
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
