

Gap tracking — what really explains them

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **Individual tracking is lawful. It is simply less effective here — and both set-ups are equipped.**

The five causes of a gap, and what tells them apart

Possible cause	Told apart by PER-PERSON tracking?	Told apart by PER-LOCATION tracking?
Undeclared breakage	No	Partly
Unrecorded issue	No	Yes
Receiving error	No	Yes
Part taken for a repair	No	Yes
Mis-scanned code	No	Yes — neighbouring labels

What per-location tracking found

Finding	Value
Gaps in total	9
Clustered on two locations	7
Real cause	Labelling confusing two neighbouring items
Time to fix	1 day
Residual gaps after the fix	0

The two storekeepers concerned, **Sofiane Adjali and Hélène Trentin**, had nothing to do with it: **it was the label**. Individual tracking would have produced two names and left the label in place.

If you want the individual level: the three conditions, ready

Condition	Basis	What the agent produces
Proportionality	Art. L1121-1, Labour Code	Reduced scope, justified in writing
Prior information	Art. L1222-4, Labour Code	Dated notice, ready to circulate
Works council consultation	From 50 employees	Full file: purpose, data, retention

That file is supplied **the day you ask for it**, with no further development.

For the company to settle

Tracking level chosen: _____

Gap threshold triggering a flag: _____ %

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
