Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **An illegible receipt is not a missing receipt**, and the cause lies with the tool: 171 of 187 come from the same screen.

Filing channel	Illegible receipts	Share
Mobile app	**171**	**91%**
Computer	11	6%
Email	5	3%

The employee sees a sharp photo, the company receives an unusable image. And they learn of it three weeks later, when the paper is asked for — which they have thrown away.

What it cost employees

Consequence	Claims	Amount
Receipt resupplied in time	153	—
Claim rejected for lack of a receipt	**34**	**€2,100**

Two thousand one hundred euros stayed out of employees' pockets for genuinely incurred business spend, because of a capture screen. That is the real cost of the defect, and it appears in no dashboard.

What is proposed, in this order

Step	Action	Time	Why that time
1	**Ask for the 22 receipts**	**24 h**	**While the ticket still exists**
2	Have the capture screen checked	—	The cause
3	**Preview before sending in the app**	—	**The employee sees what the company will receive**

What these two guarantees earn you: the 22 claims are settled within 24 h, and nobody is put in the dock

What the agent rules out	Why
Refuse the 22 claims	**The cause lies with the tool**
Count illegible receipts per employee	**That would measure their phone**
