

What is produced, and what is not

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **A ranking of employees by expense amount would say who travels most** — that is, in most companies, salespeople and field engineers.

Axis of analysis	Produced?	What it allows
Spend by category	Yes	Seeing where the money goes
Spend by project	Yes	Attaching a cost to an assignment
Spend by client	Yes	Measuring the cost of serving an account
Spend by month	Yes	Seeing seasonality
Spend by employee	No	Would measure travel, not abuse
Gap frequency per employee	No	Same reason
History of behaviour	No	Would build a permanent file

An employee at the top of an expense ranking is at the top of an expense ranking, whatever explanations accompany it — and they stay there in the memory of everyone who saw it.

If the question is one of abuse

What is provided	What is not
The claims concerned	A history of behaviour
The receipts	A score
The questions asked and the answers	A comparison with colleagues

A suspicion of abuse is handled on specific claims, with their documents, with a specific person. That is a conversation, not a dashboard — and the tool provides what the conversation needs, nothing more.

What that changes for the company

If a trip costs too much, it is the trip to look at: its frequency, its mode, its purpose. The person who made it is almost never the person who decided it had to be made.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
