Sixty-one restrictions placed, nine lifted

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

12 months · fictional document

Fictional document — demonstration example
This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **Lifting a restriction always goes through a person, including those the agent placed itself** — otherwise it would suffice to convince it it was wrong.

	Restricting	Opening
Done alone	**Yes**	**No**
Flagged the same day	**Yes**	**Not applicable**
Cost of a mistake	**An inconvenience**	**The document has been seen**
Repairable	**In a minute**	**Never**

Closing an access again does not undo the reading. On a medical or disciplinary document that is exactly what cannot be recovered.

What twelve months gave

Indicator	Value
Restrictions placed	**61**
Lifted after review	**9**
Lifted by a person	**9**
Lifted by the agent	**0**
Accesses opened by the agent	**0**

The edge case, and the rule that applies

Situation	What the agent does
It finds it restricted wrongly	**It flags it**
It corrects it itself	**Never**

An agent that can undo its own restrictions can undo any of them. The rule is only worth something if it holds against the agent too.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
