Two hundred and twelve unfiled documents

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **A misfiled document costs more than an unfiled one**: the second is visible and gets handled, the first disappears into a heading nobody will search.

Situation	Documents	What the agent says about it
Technical file name only	**103**	**The title carries no clue**
Partial title	**67**	**What it could read, with no heading**
Title ambiguous between two headings	**42**	**Both possible headings**
Total	**212**	**No heading assigned**

A misfiled document takes on its heading's access rights. That is the real consequence, and it is invisible: nobody notices a document has become readable by one more group.

What the agent does when it recognises a document

Step	Content
Filing	**The filing plan's heading**
Reason recorded	**The title, the letterhead, the layout**
Verifiable	**Yes — the reason can be reread**

What it does when it does not recognise

Step	Content
Location	**Unchanged**
Marking	**"Undetermined"**
Most likely heading	**Never proposed**

> **What is settled upstream cannot be recovered downstream:** a naming rule at the point of deposit removes the 103 cases where the title carries no clue.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
