Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **Documents are described by type, never by content** — no reason for absence, no fitness restriction, no diagnosis appears here.

What allowed them to be recognised

Clue	Read?	What it gives
File name	**Yes**	**Often the type**
Issuer's letterhead	**Yes**	**The provenance**
Form type	**Yes**	**The nature**
Folder it sits in	**Yes**	**The misfiling**
Body of the document	**No**	**—**

Document type	Count	Access before	Access after
Fitness certificate	**14**	**7 people**	**Those the note designates**
Sick note	**12**	**7 people**	**Those the note designates**
Practitioner's letter	**5**	**7 people**	**Those the note designates**
Other item on medical letterhead	**3**	**7 people**	**Those the note designates**

> **The restriction was placed the same morning and flagged the same day.** It is the only action the agent takes without asking, and it is reversible in a minute.

What stayed closed, and why

Action	Done?	Why
Open the documents	**No**	**No reason to read them**
Move them out of the file	**No**	**A move is a decision**
Delete them	**No**	**Irreversible**
State their precise nature in the flag	**No**	**The title would say too much**

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
