Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **No document content appears here** — the 34 medical documents are described by type, never by what they say.

#	Flag	What triggered it	Action already taken	Recipient	Chase
1	**41 unsigned amendments**	**Reading the files**	**None**	**HR alone**	7 d
2	**34 misfiled medical documents**	**Titles and letterheads**	**Access restricted this morning**	**HR**	**48 h**
3	9 disciplinary items out of period	**Note of 03/03/2025**	**Access restricted**	**HR, never the manager**	7 d
4	212 unfiled documents	**Titles with no established heading**	**Left in place**	Whoever files	7 d

> **The only actions taken alone go one way: less access.** No document was opened, moved or deleted.

Five acts kept by HR — that is what lets the agent work alone on everything else

The act, kept by HR	Why it is theirs
Open a medical document	**Once read, it cannot be un-read**
Delete an item	**A deletion cannot be recovered**
Open an access	**Closing it does not undo the reading**
Lift a restriction, even its own	**It would suffice to convince it it was wrong**
Guess a document's nature	**Misfiled, it takes on its heading's rights**

> **Request a demo with your own documents**

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
