Twenty-two alerts, nine deleted

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **Unread surveillance is more dangerous than none.**

The decline alert last month	Value
Firings	**14**
Of which on normal variation in a low volume	**11**
Opens	**2**

What is measured on each alert

Measure	What it indicates
Open rate	**Whether it is still read**
Times it preceded an action	**Whether it is any use**

What stays in your hands on your alerts

What stays your decision	What the agent brings you to decide with
Deleting an alert	**Its open rate and the number of times it preceded an action; it belongs to whoever created it, and they decide on those two measures**
Raising its threshold	**The same record, before and after the change: a threshold set on measurements can be defended, one raised to buy silence erases the problem from the dashboard**

Outcome for the 22 alerts

Their authors' decision	Count
Deleted	**9**
Threshold raised explicitly and dated	**5**
Judged too rare to be reliable (never fired in a year)	**2**

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
