Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **A slot met six times out of ten is not a slot: it is an estimate presented as a commitment.**

Item	Kept?	What it allows
Service times by zone and address type	Yes	Building achievable rounds
Regulatory constraints applied	Yes	Justifying a refused round
Rounds refused and their reason	Yes	Evidencing that the refusal was grounded
Slots announced and slots met	Yes	The figure nobody knew
Constraints declared by drivers	Yes	Building the round
The reason for a personal constraint	No	It serves only to contest it

The figure that explains the complaints

Finding	Value
Slot announced to customers	2 hours
Rate met	61 %
Known before measurement	No

The refused rounds

Finding	Value	What the refusal avoids
Round requests not legally achievable	11 this month	Finding out en route, where there is no solution left

What is never changed without approval

A round **already under way**. It can be recomputed and proposed; **it is not changed while it is running**.

For the company to settle

Slot length announced to customers: _____ hours

Target rate met: _____ %

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
