Constraints without reasons

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for demonstration. **The reason changes nothing in the plan, and it would be personal data kept in a logistics tool.**

Constraint received	Reason known?
Finish before a given time	**No**
Unavailable on a specific day	**No**
Zone to avoid	**No**

What you gain by asking for no reason at all

What the agent does	What it brings you
The plan is computed on the constraint alone	**Childcare, medical appointment, car share: the reason changes nothing in the plan, and it never enters your logistics tool**

What the agent does	What it brings you
Every constraint is handled on its own	**Your logistics tool never becomes the instrument that measures who has a complicated life at the moment**
Finish time, unavailability, zone to avoid: the three forms are taken as they come	**The driver declares in one line, operations have nothing to investigate, and the day's plan takes it in**

Wording used when a round becomes impossible

"*This round cannot be done with today's availability*" — not "*X is unavailable*".

The constraint is kept **for as long as it is valid, nothing afterwards**.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
