Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **A company vehicle's position is company data; a driver's speed is data about them.**

What position is used for today

Use	Beneficiary
Knowing where a round stands	Operations
Warning a customer of a delay before they call	The customer
Replanning the end of a day	The driver
Recording real service times by zone	The following rounds

It is this use that revealed the **40 minutes lost daily in the city centre**, which the "optimal" plan did not count.

If you want the individual level

Condition	Basis	Supplied
Proportionality	Art. L1121-1, Labour Code	Yes
Prior information	Art. L1222-4, Labour Code	Yes
Works council consultation	From 50 employees	Yes

The figure to know before comparing drivers

Source of variance	Share explained
Zone and address type	80 %

A driver assigned to city centres and upper floors without lifts **will always be "slower" than another**. Comparing them without correcting for the zone **means measuring their assignment**.

The measure proposed

Service time by zone and by address type. That is what makes rounds achievable, and it is not fixed by driving faster.

For the company to settle

Measurement level chosen: _____

Retention period for positions: _____ days

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
