Seven minutes against one, forty a day

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **The calculation optimises the route; a round is not a route.**

Element	Counted by the calculation?
Kilometres and traffic	**Yes**
Finding a parking space	**No**
Walking to the door	**No**
Waiting at the entryphone	**No**
Walking back to the vehicle	**No**

City-centre measurement	Value
Parking assumed by the calculation	**1 minute**
Parking observed	**7 minutes**
Urban stops in a round	**22**

City-centre measurement	Value
Cumulative gap	**40 minutes a day**

> **The driver catches up by skipping their break, or the round finishes late — and the delay is put down to the round, never to the plan.**

What the agent uses

Observed times **by zone and address type**: pedestrian zone, building with no entry code, industrial estate — three different times, measured in the company.

Claimed gain	Value
Theoretical plan	**12%**
Plan on observed times	**4%**

Less flattering, and the only one that holds.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
