Fictional document — demonstration example
This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **The agents plug into the same base and the same protocol:** what triage has gathered is never re-keyed by the next one. **Zero re-keying between them** — that is what makes the chain pay.

The six medical secretarial uses ready to deploy

Use	Status	What it does	Measured or expected gain
Administrative intake	**On**	Gathers the information the protocol provides for	**55 % → 9 %**
Protocol application	**On**	Proposes the attached referral	**30 % → 6 %**
Referral outside the protocol	**On**	Sends what is not covered to the front desk or the practitioner	**2 h 50 → 1 min 40**

Use	Status	What it does	Measured or expected gain
Voice switchboard	**On**	Picks up, gathers, hands over	**41 % → 6 % of calls missed**
Booking and letters	**To switch on**	Books the approved appointment, drafts letters to colleagues, prepares funding files	**1 h 50 of front-desk time a day**
The rest of the healthcare range	**To switch on**	Funding files, follow-up of long-term condition patients	**1,100 patients concerned**

The dividing line

Agent	Starts when	Stops when
Voice switchboard	The phone rings	The intake is done
Administrative triage	**A request arrives, whatever the channel**	**At the moment someone has to decide**
Medical secretarial	**The referral is approved**	The appointment is booked and the paperwork is ready

The fifth use, if switched on

Point	Proposal	Reason
Trial scope	**The 5 GPs**	**The two midwives have a different booking circuit — better written down calmly than discovered in production**
Duration	1 month	Enough to settle it
New data required	**None**	**Everything it needs is already gathered**

It is the next task by order of return, and it calls for no migration, no new tool and no extra keying. The centre decides the order; the agent prepares the rest.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
