Technical framework — where your volumes live

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Local inference, role-based access · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **Local inference means the model computes on your machine: a sales line does not leave your network to be analysed.** The other available route is an isolated resource hosted in France, under French law, dedicated to the company.

Why this is a commercial matter

Information	What it is worth to a third party	Where it stays
Volumes by chain	**The company's dependency, figure by figure**	**Inside your walls**
Promotional elasticities	**+ 187 % at a 30 % discount: the negotiating floor**	**Inside your walls**
Service level by SKU	The families where pressure works	Inside your walls

Information	What it is worth to a third party	Where it stays
Shortage and overstock costs	What a penalty really costs	Inside your walls

The arrangement, point by point

Element	What is put in place
Location	**A machine at the company, or an isolated resource hosted in France, under French law**
Transfers	**Deployment objective: processing and access within the European Union — architecture designed to reduce exposure to extraterritorial legislation, location alone not being enough to guarantee immunity**
Training	**No sales data trains any model**
Role-based access	**A supply planner opens their families, not the margins or the retailer agreements**
Encryption	In transit and at rest
Log	**Who consulted which forecast, corrected which assumption, settled which volume, to the second**
Supervision	**Web dashboard and supervision from a phone**: approving a commitment, withdrawing a mandate
Higher-tier options	SecNumCloud and hardened hosting according to the level required

The log makes a monthly committee unarguable three months later: which forecast was on the table, which assumptions carried it, who settled which volume and at which second. That page is produced on request, for any date.

The next step proposed

Scope	Status	Costed gain

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

9 families	**Covered**	€620,000 of cash released
480 SKUs	**Ready, tested on 3 families**	Error per SKU 21 %
Pairing with the procurement planning agent	**Costed on the 3 tightest families**	**8 fewer days of cover at constant service level, that is €240,000**

Pairing study — decision and date: _____

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
