

Forty-one sets of minutes not reviewed

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

214 sets · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **The agent records what it understood** — and it is poorly placed to approve its own understanding.

Situation	Sets of minutes
Reviewed by at least one participant	173
Circulated without review	41

Of the 173 reviewed	Count
Corrected	47
Where the correction concerned a decision	19
Where it concerned a turn of phrase	28

If the same rate applies to the 41, five of them contain a wrongly recorded decision, circulated to everyone and never corrected. The agent does not say which:

it does not know.

What is proposed

Element	Value
Review window	24 hours
Recipients during that window	Participants only
Beyond it	Circulation marked "not reviewed"

Why a marking rather than a block

Arrangement	Effect
Blocked until reviewed	The minutes never go out
Marked "not reviewed"	They go out and are read with the caution they deserve

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
