

Three signals removed, a hundred and twenty-nine rejects avoided

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **All three worked a little. All three described people.**

Signal removed	What it actually discards
Personal email domain	Freelancers, very small outfits, people writing from home
Writing quality	Non-native speakers, people in a hurry, phone writers, people not at ease in writing
Time of sending	People who work at night, or in another time zone

Writing quality is the most effective and the least acceptable of the three.

The arithmetic, done and published

Effect of removal	Value
Rise in the false-positive rate	+4 points
That is, per hundred requests passed on	4 for nothing
Rejects due solely to those three signals	129

Four points of noise against a hundred and twenty-nine messages discarded for what their author appears to be: the arithmetic is not close.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
