Three hundred and twelve requests, seventy-four revised

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for demonstration. **The statement is made BEFORE writing**: afterwards the summary exists and it carries authority.

What the agent states before writing

"*In one page I can give the subject, the conclusions and the five quantified points. The methodological reservations and the sixteen recommendations will not fit.*"

What the requester did next	Requests
Kept the length	**238**
Revised the length upwards	**74**

> **The requester wanted one page and took three once they knew what the page cost.** That is the only intended effect: making the trade-off visible before it is

made by default.

The case where the agent proposes a minimum length

Situation	What the agent does
The requested length makes the document false	**Proposes the minimum length and leaves the choice**
Example: an expert report in one page	**The reservations do not fit**

An expert report without its reservations says the opposite of what it says.

What has never been done

Practice	Used?
Holding the length by cutting into the reservations	**No**
Holding it by cutting, and saying so	**Yes, if the requester insists**

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
