Three hundred and twelve summaries, thirty-eight returns

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **Any efficiency indicator would celebrate a low return rate** — the less people return to the source, the better the summary "works".

Indicator	Value
Summaries produced	**312**
Returns to the full document	**38 — 12%**
Documents never opened in full	**41**

The 41 never opened, by nature

Document type	Count	Is it a problem?
Information notes	**18**	**No — that is the point**

Document type	Count	Is it a problem?
Minutes	**12**	**No**
Contracts	**7**	**Yes**
Expert reports	**4**	**Yes**

> **Those eleven are what the agent reports, not the 41.** An overall rate mixes documents you may leave unread with documents you must read.

What is proposed

Proposal	Nature
Certain types cannot be summarised without the source opening	**A setting**
Forbidding summaries of those types	**Not proposed**

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
