The date, and the arithmetic behind it

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **Every date announced is a checkable sum, never a guess.**

Announcement	Made?	What it rests on
End date imposed by the dependency chain	**Yes**	**Float consumed, added task by task; every day ties back to a named task**
Cumulative gap from the first date	**Yes**	**The original date is kept; the tool does not rewrite it**
Observed rescheduling rhythm	**Yes**	**Full history of replannings**
Load added to the final milestone	**Yes**	**Initial composition of each milestone kept**

What is not manufactured, and why

Announcement	Made?	Why

Probability of meeting a deadline	**No**	**No checkable calculation produces it**
"Project at risk" label	**No**	**It would trigger a meeting at a moment chosen by the machine**
Velocity computed on declared percentages	**No**	**A stack of opinions that looks like data**

On the case shown: 29 days of external wait, 17 absorbed by float, **12 days of slippage on the final milestone**, which moves from 14/11 to 26/11. **5 of those 12 days can be won back** by resequencing the 4 tasks behind the wait; the plan is written, and the decision to launch it belongs to the project manager.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

---

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
