Who decides what — three automatic actions

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Signed operating framework · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **Three actions only run without being asked, they are named, and each is withdrawn in a word.** Everything else goes through a signature or through the mandate the plant bounded.

The three automatic actions

Action	Trigger	Reversibility	What it produces
Writing every alert with its readings, its range and its deviation	Alert opened or cleared	**—**	**A complete batch file in 6 minutes**
Notifying the technician on shift	A signed rule fires	**A rule leaves the list on a word**	**640 signals per 18 months, 80 % confirmed**

Action	Trigger	Reversibility	What it produces
Flagging a silent sensor	30 identical readings	**Adjustable threshold**	**4 sensors found in three weeks**

The writing that works both ways

When an alert is cleared by the next inspection, it is written in the same place, with the reading that clears it. A closed alert is as useful in an audit as an open one: it shows the arrangement worked in both directions.

What goes through a signature, and how fast the file arrives

Decision	Who signs	Time for the file to be ready
Press setting	Production manager	**Under 3 minutes**
Line stop	Production manager	**Under 3 minutes**
Ruling on a batch	Quality manager	**Under 3 minutes**
A range or a rule entering service	Production manager	**File costed over 18 months**
Action inside the mandate's bounds	**Mandate**	**Executed in 22 minutes**

What the log keeps

Element	Content	Use
Alerts	Readings, range applied and its date, deviation	**An answer to an auditor in 6 minutes**
Decisions	**Action taken, signatory, date**	The trace between signal and decision
Rules	**Date of entry into service and signatory**	The rule in force at the time
Export	One click	**Readings in hand**

And control stays with the plant wherever it is: a web dashboard and supervision from a phone — **signing a settings sheet, suspending a rule or withdrawing the mandate takes one message**, including at 3 a.m. on a Sunday, which is precisely when the presses run with nobody there to read the readings.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

---

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
