

# Technical framework — where your parameters live

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

Local inference or an isolated resource in France · fictional document

## Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

**Fictional document**, produced for the demonstration. **128 ranges, the mould settings, the cycle times and 41 million readings**: this is the only place where what a plant does better than others can be read, and it is exactly what a competitor would look for.

## The two possible architectures

| Architecture                       | Where the computing happens      | What crosses an outside network                      | For whom                                |
|------------------------------------|----------------------------------|------------------------------------------------------|-----------------------------------------|
| Local inference                    | On a machine at the plant        | Nothing                                              | Sites already hosting their supervision |
| Isolated resource hosted in France | Environment dedicated to Polvane | One encrypted flow, never leaving the European Union | No pooling with another manufacturer    |

## What is protected, and by what

| Protection               | Implementation                                                                                            | What it makes verifiable                                                                                                                                                              |
|--------------------------|-----------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Encryption               | In transit and at rest                                                                                    | —                                                                                                                                                                                     |
| <b>Role-based access</b> | <b>A setter opens the readings for their own press, not the mould parameters of the other three lines</b> | <b>The list of roles and their rights, exportable</b>                                                                                                                                 |
| <b>Logging</b>           | Who consulted what, and when                                                                              | <b>Usable as it stands in a quality audit</b>                                                                                                                                         |
| <b>Retention</b>         | Periods set by the plant, aligned with its customer traceability commitments                              | <b>A dated purge log</b>                                                                                                                                                              |
| <b>Location</b>          | <b>France, under French law</b>                                                                           | <b>Architecture designed to reduce exposure to extraterritorial legislation, location alone not being enough to guarantee immunity, including where a US provider hosts in Europe</b> |
| Use of the data          | <b>No reading trains an outside model</b>                                                                 | A written undertaking                                                                                                                                                                 |

## What that opens commercially

| Fact                                            | Value                                 | Consequence                                                                    |
|-------------------------------------------------|---------------------------------------|--------------------------------------------------------------------------------|
| <b>Automotive customer's framework contract</b> | —                                     | <b>Absence of transfer outside the European Union written into the renewal</b> |
| <b>Latest supplier questionnaire</b>            | <b>Hosting scored out of 5 points</b> | <b>Box ticked without reservation</b>                                          |
| Position                                        | —                                     | <b>The only one on the shortlist to have shown it in writing</b>               |

**Technical sheet kept up to date continuously:** hosting, subprocessors, retention periods, who has access to what, date of the last check. **It gets asked for at every audit and it used to take three days to find.**

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
